## Consumer Price Index <br> August 2009

|  | CPI and HICP |  |  |  |
| :---: | :---: | :---: | :---: | :---: |
|  | CPI |  | HICP |  |
|  | \% monthly change | \% annual change | \% monthly change | \% annual change |
| Apr 2009 | - 0.8 | - 3.5 | + 0.1 | - 0.7 |
| May 2009 | - 0.5 | - 4.7 | -0.4 | - 1.7 |
| Jun 2009 | - 0.3 | - 5.4 | - | - 2.2 |
| Jul 2009 | - 0.8 | - 5.9 | - 0.8 | - 2.6 |
| Aug 2009 | + 0.4 | - 5.9 | + 0.2 | - 2.4 |

## Prices fall by 5.9\% in the year to August

Consumer Prices in August, as measured by the CPI, increased by $0.4 \%$ in the month. This compares to an increase of $0.5 \%$ recorded in August of last year. As a result, prices on average, as measured by the CPI, were 5.9\% lower in August compared with August 2008.
The EU Harmonised Index of Consumer Prices (HICP) increased by $0.2 \%$ in the month, compared to no change recorded in August of last year. As a result, prices on average, as measured by the HICP, were $2.4 \%$ lower in August compared with August 2008.
The most notable changes in the year were decreases in Housing, Water, Electricity, Gas \& Other Fuels (-27.8\%), Clothing \& Footwear (-13.2\%), Food \& Non-Alcoholic Beverages (-4.8\%) and Transport (-3.7\%). There were increases in Miscellaneous Goods \& Services (+7.9\%), Alcoholic Beverages \& Tobacco $(+7.7 \%)$, Education ( $+3.9 \%$ ) and Health ( $+2.7 \%$ ).
Services prices fell by $6.8 \%$ in the year to August, while Goods fell by 5.0\%.
The most significant monthly price changes were increases in Clothing \& Footwear (+3.4\%), Housing, Water, Electricity, Gas \& Other Fuels (+1.1\%) and Transport $(+1.1 \%)$. There was a decrease in Food \& Non-Alcoholic Beverages ( $-1.0 \%$ ).
The main factors contributing to the monthly change were as follows:

- Clothing \& Footwear rose due to a recovery in prices following the traditional summer sales.
- Housing, Water, Electricity, Gas \& Other Fuels increased due to higher average mortgage interest repayments. These were partially offset by decreases in private rental charges.
- Transport rose due to increases in airfares and petrol \& diesel prices.
- Food \& Non-Alcoholic Beverages fell due to lower prices across a wide range of food items.
The CPI excluding tobacco index for August increased by $0.4 \%$ in the month and was down $6.5 \%$ in the year. The CPI excluding energy products index rose by $0.2 \%$ in the month and decreased by $5.4 \%$ in the year. The CPI excluding mortgage interest increased by $0.2 \%$ in the month and was down by $1.8 \%$ in the year.

## Background Notes - Consumer Price Index

Definition The Consumer Price Index is designed to measure the change in the average level of prices (inclusive of all indirect taxes) paid for consumer goods and services by all private households in the country and by foreign tourists holidaying in Ireland.

## Consumer Price Index (CPI)

Over 50,000 prices are collected for a representative basket consisting of 616 headings which cover over 1,000 different items in a fixed panel of retail and service outlets throughout the country on the second Tuesday of each month. The date to which the August index relates is Tuesday, 11th August, 2009.

Scope of the (I) Population Coverage: All private households in the state and the expenditure of foreign Index tourists within Ireland. It does not include the expenditure of persons in institutions and other non private households. Expenditure which occurs abroad by Irish residents is also excluded. In statistical terms coverage is referred to as the domestic concept.
(ii) Geographic Coverage: Covers the whole of the Republic of Ireland. Pricing takes place in 84 locations (cities and towns) throughout the country. These sampling points are located in Dublin city and county, the four regional cities of Cork, Limerick, Galway and Waterford, approx. $80 \%$ of towns with a population of 10,000 and over, approx. $70 \%$ of towns between 5,000 and 9,999 and a smaller proportion below this threshold. The results are weighted to represent the distribution of the population and its related consumer expenditure.
(iii) Item Coverage: All goods and services bought by the reference population for the purposes of consumption are included in the index. Expenditure on capital assets and investments, gambling and certain other activities are however excluded. Over 1,000 different varieties are priced and then aggregated into 616 item headings and 12 group headings based on the COICOP classification. With each rebase the coverage of goods and services is reviewed to ensure that it continues to be representative of consumer tastes and purchasing practices.

Price Collection Personal visits are made to retail outlets by some 200 part-time pricers on a monthly basis. Approximately 50,000 price quotations are gathered in this way. In addition, 114 special inquiries covering items such as utility charges and services are conducted by post and telephone. Most prices are collected monthly, some quarterly and others annually. The CSO supplies general specifications to price collectors and collectors are free initially to select a brand and in certain cases, size. This allows for a wide variety of different brands of the same item to be priced throughout the country. Once selected, the same item/brand is priced on a monthly basis in order to ensure matched price quotations. If an item disappears, substitution can occur but that price is excluded until matched prices are available for the same comparable item for two consecutive months. The CSO wishes to put on record its appreciation of the co-operation and assistance it receives from retail outlets and other business concerns.

CPI Weights The CPI measures in index form the monthly changes in the cost of purchasing a fixed representative 'basket' of consumer goods and services (i.e. Laspeyres formula). The representative share of each item in this basket is proportional to the average amount purchased by all households in the country as determined by the Household Budget Survey and by foreign tourists in this country using estimates of expenditure by tourists across a range of consumer goods and services. Individual items typically purchased by foreign tourists while holidaying in Ireland such as hotel accommodation and meals out have been adjusted to take account of the additional tourist expenditure. Identical items are priced in the same outlet on each occasion so that changes in the cost of this constant basket reflect only pure price changes.

## Background Notes - Consumer Price Index (continued)

Classification The classification used in the CPI is based on a version of COICOP - COICOP HICP, the Classification of Individual Consumption Expenditure by Purpose. This replaced the former national classification which was used up to December 2001. The COICOP classification breaks consumer expenditure into twelve different categories covering a comprehensive range of consumer goods and services.

Methodological A full methodological description of the new series is available in the CPI 2006 Introduction to Details Series booklet which is published on the website at
http://www.cso.ie/surveysandmethodologies/documents/pdf_docs/introduction_to_series_base _december_2006.pdf

Utilities and Includes electricity, gas, landline telecommunications and waste collection \& disposal charges. Local Charges

Rebase The index has been rebased with effect from December 2006, the tenth series since the foundation of the State. The index was last rebased in January 2002 (Base December $2001=100$ ).

The rebase of the current CPI resulted in a number of methodological changes:

- Updating the expenditure weights;
- A revision of the sample of goods and services;
- An update of the sample of areas priced; and
- A reorganisation of the sample of locations on a regional basis.

Goods and The consumer basket can be split into two constituent parts - goods and services according to the Services following definitions.

Goods Goods are defined as non service items usually purchased and transportable from a retail outlet the basket excluding services.

Services Services include electricity, gas, telecommunications and other public utilities, alcoholic beverages consumed on licensed premises, meals out, accommodation services, public transport, medical fees, insurances, education fees, hairdressing \& other personal services, childcare \& social protection, entertainment \& recreation services, mortgage interest \& rents, package holidays and other miscellaneous services.

## Background Notes - Harmonised Index of Consumer Prices

Introduction The EU-Harmonised Index of Consumer Prices is calculated in each Member State of the European Union. The purpose of this index is to allow the comparison of consumer price trends in the different Member States.

## Comparison

The methodology now adopted for the construction of the national CPI is identical to that recomwith CPI mended for the HICP. Thus the two indexes only differ in respect of the coverage of certain goods and services and the definition of insurance. The current EU reference base period (Year $2005=$ $100)$ is however retained for ease of comparison with other EU countries.

Excluded Items The following items, constituting approximately 9.5\% of the Irish CPI expenditure weighting, are excluded from the HICP:

- mortgage interest
- motor car insurance (non-service)
- building materials
- dwelling insurance (non-service)
- concrete blocks
- motor car tax
- union subscriptions
- motor cycle tax

Weights The expenditure weighting system used in the HICP is the same as that used for the CPI excluding the items listed above. In addition the weights of House Insurance (Buildings) and Health Insurance differ because of definition. Taking all these factors into account the HICP expenditure covers just under $90 \%$ of total CPI expenditure.

Monetary Union The MUICP is calculated as a weighted average of HICPs of the 15 countries participating in Index of Stage III of Economic and Monetary Union (EMU). Country weights are computed every year reflecting the country's share of private final domestic consumption expenditure in the EMU total.

Classification The coverage of the indices is based on the international classification system, COICOP (classifiSystem cation of individual consumption by purpose).

# Background Notes - COICOP Classification 

# CPI and the HICP both use the COICOP/HICP classification (Classification of Individual Consumption by Purpose - adapted for the purposes of the EU HICP). 

The COICOP classification is based on 12 main subgroups.

01 Food and Non
Alcoholic Beverages

02 Alcoholic
Beverages and
Tobacco

03 Clothing and Footwear

04 Housing, Water, Electricity, Gas and Other Fuels

05 Furnishings, Household Equipment and Routine Household Maintenance

06 Health

07 Transport

08 Communications

09 Recreation and Culture

Food and non alcoholic beverages purchased in supermarkets, small shops, speciality shops and petrol station forecourt outlets. It excludes meals out which are covered under 11 Restaurants and Hotels.

Includes alcoholic beverages purchased in off licences and supermarkets but excludes alcohol consumed on or within a licensed premises which is classified under 11 Restaurants and Hotels.

Mens, ladies and childrens clothing and footwear, sports and leisurewear and services such as laundry and dry cleaning, shoe repair, dress hire and alteration.

This group covers rents, mortgage interest repayments, waste collection and disposal charges, goods and services for maintaining, decorating and repairing dwellings and domestic energy products such as electricity, gas and solid fuels.

This category covers household items such as furniture, carpets and other floor coverings, house textiles and soft furnishings, household electrical appliances, and other household items such as utensils, tools, garden equipment and non-durable items for cleaning, washing and other day to day household activity. Also included in this category are domestic services such as cleaning and other services.

Health includes medical products, appliances and equipment, hospital charges and out patient services supplied by doctors, dentists, opticians and practitioners of alternative and complimentary medicine.

Includes the purchase of new and second hand vehicles, spare parts, car maintenance, fuels and lubricants, public transport and services such as parking, motor association subscriptions, car wash, toll charges, driving tests, licences and car hire.

Post and telecommunications.

All goods and services connected with recreation and culture and includes items such as audio visual and photographic equipment, computers, music and DVDs, sports and recreation goods, games and toys, items connected with gardening and pets, recreational, sporting and cultural activities and events, newspapers and other reading material, package holidays and other items connected with recreation and culture.

10 Education Covers all aspects of education including primary, secondary, third level and other education and training such as night courses, play schools and examination fees.

11 Restaurants and Hotels

12 Miscellaneous Goods and Services

This category covers the following areas: meals in restaurants and hotels; fast food and takeaways; cafes; canteens; alcohol consumed on or within a licensed premises and accommodation services supplied by hotels, guesthouses and hostels.

This remaining category covers a wide range of items including hairdressing and other grooming; goods for hygiene, hair and body care; personal goods such as jewellery, handbags and wallets; childcare and other social protection services; insurance, financial services and other services including funerals, weddings, legal and professional services.

## Background Notes - Calculation of Percentage Changes and Contributions

Calculating
percentage
changes in the index

The movement of the CPI, HICP and their subindices are expressed as percentage changes, rather than changes in index points, because index point changes are affected by the level of the index in relation to its base period, whereas percentage changes are not. The example below illustrates the computation of index point and percentage changes.

| Index point change |  |
| :--- | ---: |
|  |  |
| CPI | 106.7 |
| Less previous index | 103.7 |
| Equals index point change | 3.0 |
|  |  |
| Percentage change |  |
|  |  |
| Index point difference | 3.0 |
| Divided by the previous index | 103.7 |
| Equals | 0.0289 |
| Results multiplied by 100 | $0.0289 \times 100$ |
| Equals percentage change | 2.9 |

[^5]Example: To estimate the contribution of Food \& Non-Alcoholic Beverages (COICOP 01) to the overall annual percentage change in the CPI up to July 2006 you would need the following data

| 1. Base weight for COICOP 01 (base December 2001): | $14.092 \%$ |
| :--- | :--- |
| 2. Current Index (i.e. July 2006) for COICOP 01: | 103.7 |
| 3. Previous Index (i.e. July 2005) for COICOP 01: | 102.1 |
| 4. All Items Consumer Price Index for the previous period (i.e. July 2005): | 111.3 |

| Steps in the <br> calculation | Step 1: Multiply the base weight by the current index: | $14.092 \times 103.7$ |
| :--- | :---: | :--- |
|  | Equals (1) | 1461.3404 |
|  | Step 2: Multiply the base weight by the previous index: | $14.092 \times 102.1$ |
|  | Equals (2) | 1438.7932 |
|  | Step 3: Subtract figure (2) from figure (1) | $1461.3404-1438.7932$ |
|  | Equals (3) | 22.5472 |
|  | Step 4:Divide figure (3) by the previous All Items CPI <br> Equals Contribution | 111.3 |
|  | Equ.20 |  |

Therefore your estimated contribution of Food \& Non-Alcoholic Beverages to the percentage change in the CPI for the year to July 2006 is 0.20 . The actual published figure was 0.19 . The difference is due to the fact that actual published contributions are calculated using data to more decimal places.

The first and second releases for the two periods involved will contain sufficient information to allow contributions to be estimated for a large number of CPI and HICP categories. It is more complicated to estimate contributions where more than one base period is involved, as the base weights will have changed (e.g. to estimate a contribution for the period January 2000 to January 2005 involves the November 1996=100 base and the December 2001=100 base). For assistance in this regard please contact the CPI section.

## Background Notes - Data Dissemination on www.cso.ie

The CSO website (www.cso.ie) now holds a range of CPI data. Within the Consumer Prices section of the website (accessed via the 'Prices' link on the homepage), a range of principle statistics are held including overall annual percentage changes from 1970 to date and All Items CPI index numbers from 1996 to date.

Further data can be accessed at www.cso.ie by clicking on 'Database Direct' and 'CSO Main Dissemination Service'. The subject area is 'Economy' and 'Prices'. The website is updated each month at 11 am on the CPI publication day.

The Database Direct for the CPI contains monthly and annual index numbers and percentage changes for the following categories and time periods:

| Category | Period |
| :--- | :--- |
| All Items CPI | 1975 to date |
| 12 Main COICOP Subgroups | 1975 to date |
| Special CPI Subindices <br> (e.g. CPI Excluding Tobacco, Energy Products etc) <br> Harmonised Index of Consumer Prices (HICP) | 1975 to date |
|  | 1997 to date |

In addition, the following data can also be accessed within Database Direct.

- Monthly index numbers and annual percentage changes for the Constant Tax Price Index from 1997 to date.
- National average prices for selected CPI goods and services from January 1997 to date.
- All Items CPI index numbers for various base periods from 1922 to date
- Detailed sub-indices now available from 2003 to date.

## Any queries relating to the usage of the web dissemination database for CPI data should be directed to

Andrew Murray at 0214535122 (email andrew.murray@cso.ie)
or
Noreen Dorgan at 0214535427 (email noreen.dorgan@cso.ie).

[^0]:    ${ }^{1}$ Data prior to December 2006 is linked to current Consumer Price Index at mid-December 2006.

[^1]:    ${ }^{1}$ Includes alcoholic beverages consumed on licensed premises.
    ${ }^{2}$ Non service items usually purchased and transportable from a retail outlet.
    ${ }^{3}$ Electricity, gas, telecommunications, alcoholic beverages consumed on licensed premises, meals out, housing, rent, mortgage interest repayments, insurance, public transport, entertainment and recreation, education, household services and miscellaneous services including childcare, social protection, package holidays and other services.
    ${ }^{4}$ Electricity, gas, landline telecommunications and waste collection \& disposal charges.
    ${ }^{5}$ Constitutes part of 02 (see page 12 - off-licence sales) and part of 11 (see page 12 - alcohol consumed on licensed premises) giving a combined index for alcohol.

[^2]:    ${ }^{1}$ Totals may not equal the sum of the categories due to rounding differences.

    09 Recreation and culture
    10 Education
    11 Restaurants and hotels
    12 Miscellaneous goods and services

[^5]:    Estimating A contribution represents the amount of the overall percentage change in the all items index Contributions which is accounted for by any given category. It can be estimated for any category in the CPI (e.g. the twelve COICOP 2 digit groups) and for any period of time.

    Data Required: 1. Base Weight for the category for which you wish to estimate the contribution.
    2. Current Index for the category in question with base December $01=100$.
    3. Percentage change for the category in question for the period for which you wish to estimate a contribution.
    4. All Items Consumer Price Index for the previous period in question (i.e. the start period).
